Ideation Phase

Empathize & Discover — Empathy Map Canvas

Date	28 October 2026
Team ID	EN25CS3010040
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	4 Marks

Target user: Sports enthusiast, researcher, student, or data analyst exploring Olympic performance.

The empathy map summarizes the target user's likely needs and challenges when exploring the project's Tableau analysis.

SAYS

- "I need a clear way to compare countries, sports, and Olympic results."
- "Which countries and regions perform best?"
- "Where can I find medal trends and participation figures together?"

THINKS

- Medal totals alone may not explain overall performance.
- Different sports, regions, and host countries need to be compared fairly.
- Reliable, well-organized data will make conclusions easier to trust.

DOES

- Compares medal totals by country and sport category.
- Checks medal trends over years and host-country performance.
- Uses Tableau charts, including bars, lines, bubbles, pie charts, and a donut chart.
- Reviews KPIs for athlete participation, nations, sports categories, and efficiency.

FEELS

- Confused when information is spread across multiple datasets.
- Wants confidence that comparisons and figures are accurate.
- Feels more informed when patterns are presented visually.

PAINS

- Manually combining datasets takes time.
- Medal counts can hide differences in sport categories and regional efficiency.
- Inconsistent or unclear metrics can make comparisons difficult.

GAINS

- A single interactive dashboard for global Olympic performance.
- Quick identification of leading countries, sports, and regions.
- Clear trends, participation measures, and medal-efficiency insights to support analysis.

Project focus: Compare medal performance, yearly trends, host-country results, regional efficiency, and participation through visual analysis.
