Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A sports enthusiast or researcher	Compare Olympic medal performance across countries, sports, host nations, and years.	The information is spread across datasets, making comparisons difficult.	Medal totals, yearly trends, host-country results, and athlete participation must be combined and reviewed separately.	Confused and overwhelmed when trying to identify top-performing countries and meaningful trends.
PS-2	A student or sports data analyst	Understand athlete participation, sport-category performance, regional medal efficiency, and the relationship between investment and medals.	It is difficult to interpret these measures together and see how regions and sports compare.	Key indicators such as average medals per athlete, medal efficiency, regional distribution, and investment-versus-performance need clear visual summaries.	Frustrated and less confident making data-driven comparisons or drawing conclusions.
