Project Design Phase-II
Data Flow Diagram & User Stories

Date	28 October 2026
Team ID	EN25CS3010040
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Dashboard Access	USN-1	As a user, I want to view Olympic performance dashboards on a mobile device.	Dashboard content is readable and charts remain accessible on a mobile screen.	High	Sprint-1
	Medal Analysis	USN-2	As a user, I want to explore country medal rankings and medal-type comparisons.	Medal rankings and medal categories are clearly displayed.	High	Sprint-1
	Trend Analysis	USN-3	As a user, I want to explore Olympic medal trends across years.	The medal trend chart displays available year-wise data.	High	Sprint-2
	Dashboard Filters	USN-4	As a user, I want to use supported filters to explore Olympic data.	Supported filters update their relevant visualizations.	Medium	Sprint-1
	Story Access	USN-5	As a user, I want to navigate the Tableau Story to understand key findings.	All four Story points can be viewed.	High	Sprint-1
Customer (Web user)	Athlete Analysis	USN-6	As a web user, I want to explore athlete gender and sport participation patterns.	Gender and sport participation charts display available data.	High	Sprint-2
	Host & Investment Analysis	USN-7	As a web user, I want to explore host-country medal performance and investment-category averages.	Both charts display their available categories and values.	Medium	Sprint-2
Customer Care Executive	Data & Dashboard Support	USN-8	As a support executive, I want to help users understand dashboard filters and visualizations.	Users can be guided to the relevant chart, filter or Story point.	Medium	Sprint-2
	Issue Reporting	USN-9	As a support executive, I want to document incorrect or unclear dashboard results reported by users.	Reported issues can be recorded for review and correction.	Low	Sprint-2
Administrator	Data Management	USN-10	As an administrator, I want to review the source datasets and data relationships.	The four CSV sources and their configured relationships can be inspected.	High	Sprint-1
	Dashboard Maintenance	USN-11	As an administrator, I want to maintain charts, filters and dashboard layouts.	Changes can be checked in Tableau before republishing the workbook.	High	Sprint-2
	Publication Management	USN-12	As an administrator, I want to publish updated dashboards for users.	The updated workbook is published and accessible using the configured sharing settings.	Medium	Sprint-2
