Dashboard Design

Date	28 October 2026
Team ID	EN25CS3010040
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	5 Marks

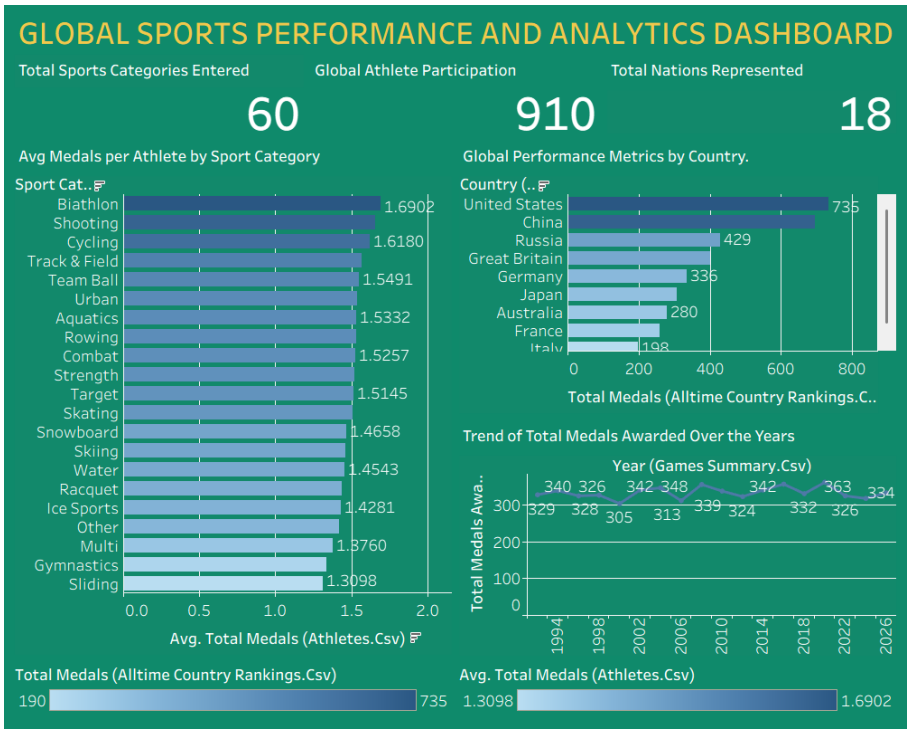

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

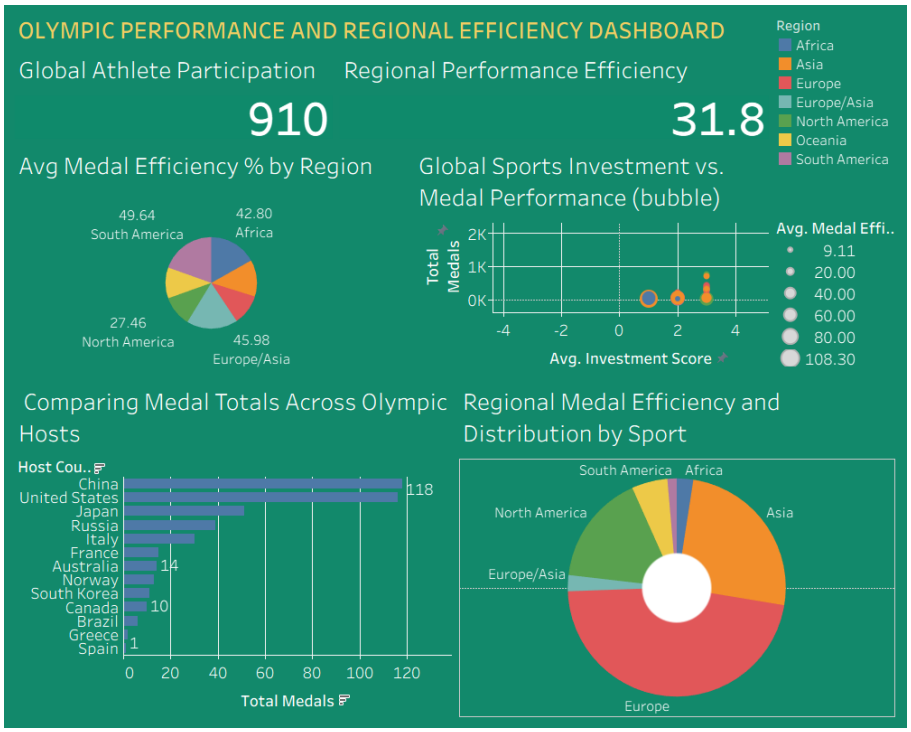

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Major Outcomes from the Global Olympic Sports Performance Analysis Dashboards

Here are seven major outcomes from the dashboards:

- **Participation Overview**: Dashboard 1 reports 60 total sport categories entered, 910 athletes in global participation and 18 nations represented, showing the scale of the data analysed.

- **Leading Countries**: The United States has the highest total medals with 735, followed by China (696) and Russia (429).
- **Medal Trend Over Time**: Total medals awarded stay between 305 (2000) and 363 (2020) across 1992 to 2026, showing ups and downs rather than a steady rise or fall.
- **Medals per Athlete by Sport**: Biathlon has the highest average medals per athlete (1.6902), followed by Shooting (1.6563) and Cycling (1.6180), while Sliding is lowest (1.3098).
- **Regional Medal Efficiency**: South America has the highest average medal efficiency (49.64%), followed by Europe/Asia (45.98%) and Africa (42.80%); North America is lowest (27.46%). Dashboard 2 shows a regional performance efficiency of 31.8.
- **Investment and Medal Performance**: The bubble chart shows the countries with the highest medal totals at the highest investment score of 3. This is an association and does not prove that investment directly causes medals.
- **Host Countries and Regional Share**: Among host nations, China (118) and the United States (116) lead, followed by Japan (51). The donut chart shows Europe with the largest regional share, followed by Asia.
