Story

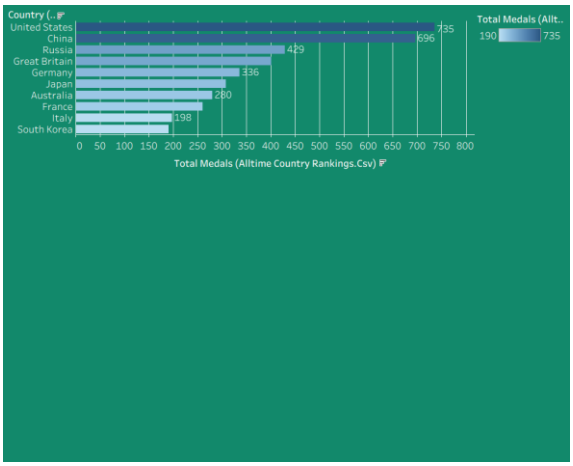

Date	28 October 2026
Team ID	EN25CS3010040
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

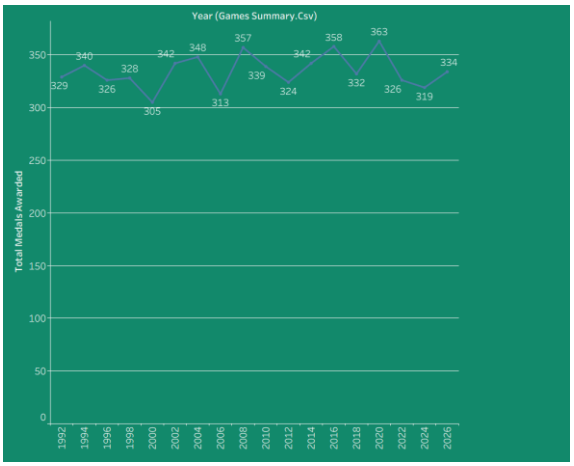

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

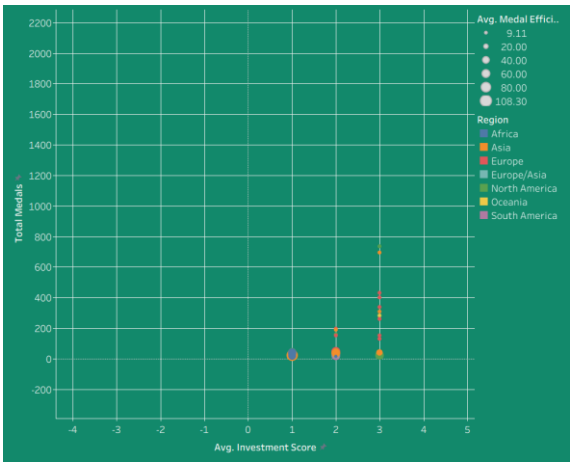

Story point 1: Average Medals per Athlete by Sport Category

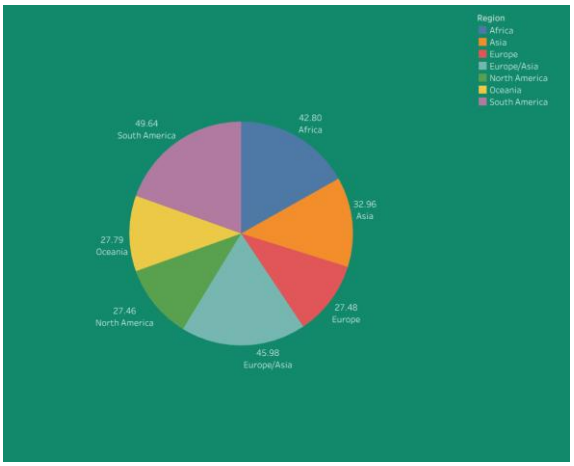

Story point 2: Total Medals by Country

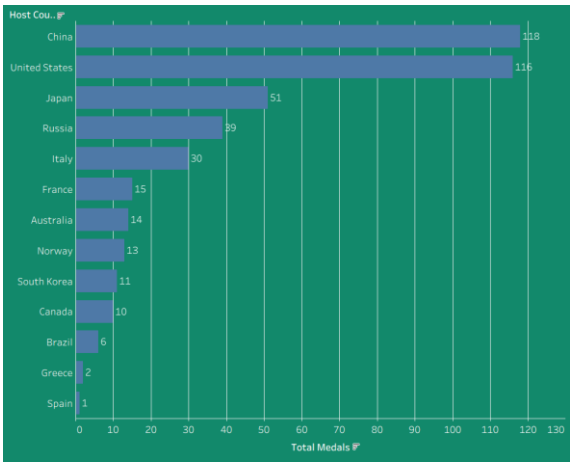

Story point 3: Total Medals Awarded by Year

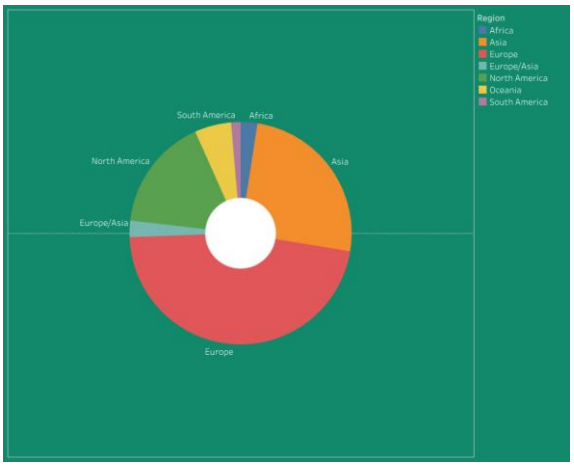

Story point 4: Global Sports Investment vs. Medal Performance

Story point 5: Average Medal Efficiency per Region

Story point 6: Comparing Medal Totals Between Hosts

Story point 7: Regional Medals

Story point 8: Global Athlete Participation

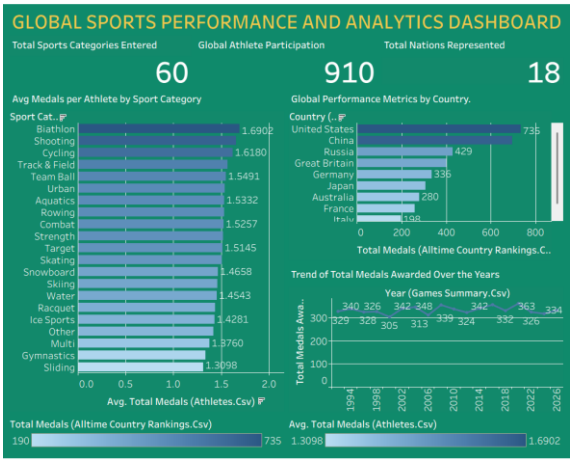

Story point 9: Total Sports Categories

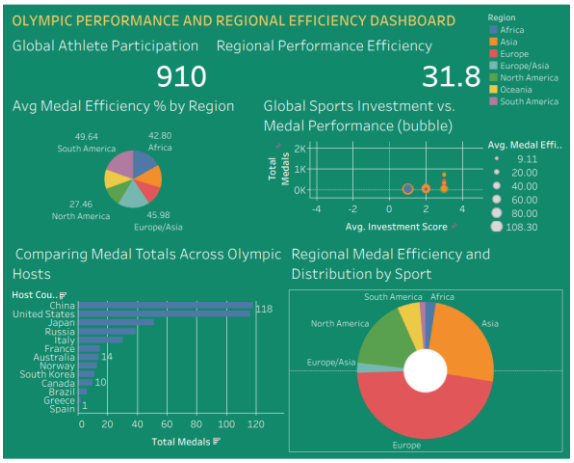

Story point 10: Total Nations Represented

Story point 11: Regional Performance Efficiency

Story point 12: Global Sports Performance and Analytics Dashboard

Story point 13: Regional Olympic Performance Dashboard

Observations:

- **Sport Category Performance**: Biathlon has the highest average medals per athlete (1.6902), followed by Shooting (1.6563) and Cycling (1.6180), while Sliding is the lowest (1.3098).
- **Leading Countries**: The United States leads total medals with 735, followed by China (696) and Russia (429).
- **Medal Trend Over Time**: Total medals awarded range from 305 (2000) to 363 (2020) between 1992 and 2026, showing ups and downs rather than a steady rise or fall.
- **Investment and Medals**: The countries with the highest medal totals sit at the top investment score of 3. This is an association and does not prove that investment causes medal success.
- **Regional Medal Efficiency**: South America has the highest average medal efficiency (49.64), followed by Europe/Asia (45.98) and Africa (42.80); North America is the lowest (27.46).
- **Host Nations**: Among host nations, China (118) and the United States (116) lead, followed by Japan (51), Russia (39) and Italy (30).
- **Regional Distribution**: In the regional medal distribution, Europe holds the largest share, followed by Asia.

- **Key Figures**: The story reports 910 athletes, 60 sport categories, 18 nations represented and a regional performance efficiency of 31.8.

Overall Outcome: The 13-point Tableau Story presents the findings in a structured sequence, from sport and country performance, through trends, investment, regional and host comparisons, to two summary dashboards.

Activity 2:

Publish Story on Tableau Public and Paste Public link below
